DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are indefinite because they initially claim the subcombination of a roof venting/cover assembly (the roof is only recited in functional language), however, the claims then later recite a combination with the roof (i.e. "within the opening in the soffit"). It is unclear whether applicant intends to claim the subcombination or the combination, therefore, for purposes of examination in this first Office Action, the Examiner is considering the claims to be drawn to the subcombination of the roof venting/cover assembly only. Applicant is advised to clearly amend the claims in order to recite either the combination or subcombination, and to be consistent throughout the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 2 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Mantyla ('516). Mantyla teaches a housing that includes a narrow upper duct portion 20, a wide lower scoop portion 36, the narrow upper portion has an open upper end, the lower portion has an open lower end, there is a cover member 14 openably secured to the open upper end of the duct portion, there is a ventilation grate 30 secured over the open lower end of the lower portion, the cover member includes a peripheral frame (as seen in Figure 1 around 14) around the open upper end, and the peripheral frame includes a raised peripheral lip (as seen in Figure 1) extending upwardly from the inner edge thereof.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mantyla ('516) in view of Calandra ('386). Mantyla teaches a

venting/cover assembly as stated above, but does not include a cover member with an openable lid hingedly coupled with the raised peripheral lip on the open upper end. Calandra teaches that it is known to provide an openable lid 24 that is hingedly coupled with a raised peripheral lip of a cover on a duct system. Accordingly, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place an openable lid on Mantyla's vent opening (at 14) in order to reduce unwanted air flow through the vent system.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer I Thissell whose telephone number is (703) 306-5750. The examiner can normally be reached Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on (703) 308-0839.
